Chemistry is the scientific discipline involved with elements and compounds composed of atoms, molecules and ions: their composition, structure, properties, behavior and the changes they undergo during a reaction with other substances.

Chemistry - Wikipedia

Chemistry is a natural science that studies the composition, structure, and properties of matter, as well as the changes it undergoes during chemical reactions. It is a central science that bridges physics and biology. The study of chemistry involves the use of experimental techniques and theoretical models to understand the behavior of matter at the molecular and atomic levels. Key areas of research include organic chemistry, inorganic chemistry, physical chemistry, and biochemistry.
