

circles general conic form pdf

A circle is a simple closed shape. It is the set of all points in a plane that are at a given distance from a given point, the centre; equivalently it is the curve traced out by a point that moves so that its distance from a given point is constant.

Circle - Wikipedia

A map projection is a systematic transformation of the latitudes and longitudes of locations from the surface of a sphere or an ellipsoid into locations on a plane. Maps cannot be created without map projections.

Map projection - Wikipedia

Here the universe is presented in an almost Aristotelian-looking two-dimensional circularity, but we see that a possible reason for such is the ultimately trumping center of God and his dwelling place.
