Humans are a unique reservoir of heterogeneous and vivacious group of microbes, which together forms the human-microbiome superorganism. Human gut serves as a home to over 100–1000 microbial species, which primarily modulate the host internal environment and thereby, play a major role in host health.

Benefaction of probiotics for human health: A review

See Chapter II.C.2.j for additional guidance on the mentoring and data management plan requirements for collaborative proposals. NSF will combine the proposal submission for printing or electronic viewing.
